Career Objective

Motivated Computer Science Engineering student and aspiring Full Stack Developer with knowledge of Java, Python, React, JavaScript, Node.js, MongoDB, and modern web technologies. Seeking an opportunity to apply my programming, problem-solving, and software development skills in real-world projects. Eager to build scalable and user-friendly web and mobile applications, contribute effectively to a team, and continuously enhance my technical expertise while growing as a software professional.

TECHNICAL SKILLS

Soft Skills

Cognitive : Problem-Solving, Critical Thinking
Teamwork : Collaboration, Communication
Personal : Adaptability, Time Management

Technical Skills

Languages : Python, Java, JavaScript
Frontend : HTML5, CSS3, React.js
Backend : Django, Node.js, Express.js
Databases : MongoDB, SQLite
Tools : Git, GitHub, Vercel, Figma, Linux

EXPERIENCE

Django Developer Intern <i>Hippocloud</i>	2025 <i>Visakhapatnam</i>
- Developed and enhanced Django-based web applications by implementing backend functionality, database-driven modules, and reusable application components for real-world business requirements. - Designed and integrated RESTful APIs for efficient communication between frontend interfaces and backend services, including request handling, validation, data processing, and structured JSON responses. - Worked with Django models, views, URL routing, forms, templates, and database operations to build maintainable and scalable application workflows. - Implemented CRUD functionality and backend validations while improving application reliability, usability, and data consistency across different modules. - Collaborated with the development team to debug issues, test features, review implementation approaches, and deliver enhancements within project requirements.	
Java & Python Trainee <i>Sdvvl</i>	2024 <i>Kakinada</i>
- Completed intensive training in Java and Python covering programming fundamentals, object-oriented programming, data structures, exception handling, file handling, and modular application development. - Practiced problem-solving by implementing algorithms and programming exercises involving arrays, strings, collections, searching, sorting, functions, and logical reasoning. - Strengthened understanding of debugging, code organization, reusable functions, and writing efficient and readable programs for different problem statements.	

PROJECTS

Online Temple Information System	<i>React.js, Node.js, Express.js</i>	Source Code
Real-Time Temple Information Platform: Developed a full-stack web application that provides users with centralized access to temple information, schedules, services, and other important details through a responsive digital interface. Tech Stack: React.js, Node.js, Express.js, JavaScript, HTML5, CSS3 Contribution: Designed responsive frontend components and implemented backend APIs for retrieving and managing temple-related information, with a focus on clean navigation and accessible user interaction. Key Features: Structured temple profiles, information pages, service details, schedule-oriented content, API-based data communication, and responsive layouts for desktop and mobile users. Outcome: Simplifies access to temple information by bringing frequently required details into a single web platform and demonstrates practical full-stack application development.		
MernShop – E-Commerce Website	<i>React, MongoDB, Express.js</i>	Source Code
Real-Time E-Commerce Platform: Developed and deployed a full-stack shopping website that enables users to browse products, manage accounts, interact with product information, and place orders through a responsive web interface. Tech Stack: React.js, MongoDB, Express.js, Node.js, JavaScript, HTML5, CSS3 Contribution: Built reusable React components and connected the frontend with REST-style backend services and MongoDB for persistent product, user, and order-related data. Key Features: User authentication, product management, product browsing, order handling, database integration, responsive UI, and structured backend API communication. Outcome: Demonstrates end-to-end full-stack development skills including frontend architecture, server-side development, database management, authentication workflows, and deployment.		

Aniset / Anify Android App	<i>Android, Java, UI/UX</i>	<u>Project</u>
• Android Application: Built and published a feature-rich Android application focused on widgets, personalization, wallpapers, utilities, and productivity-oriented features for everyday users. • Tech Stack: Android, Java, XML, REST APIs, UI/UX Design, Git • Contribution: Designed application screens, implemented Android functionality, integrated backend content, handled UI states, and continuously improved the user experience through iterative releases. • Key Features: Ready-to-use widgets, aesthetic clocks, wallpapers, live wallpaper concepts, focus and blocking utilities, system utilities, widget customization, search, categories, and theming options. • Product Monetization: Published the application through Google Play and worked on release management, feature updates, user feedback, monetization, and product improvement. • Outcome: Gained practical experience in Android development, UI/UX, API integration, application publishing, product iteration, and building software for real users.		

EDUCATION

B.Tech in Computer Science Engineering	2027
<i>GMR Institute of Technology</i>	
Diploma in Computer Engineering	2024
<i>KIET Group of Institutions, Coringa</i>	<i>CGPA: 6.8</i>
10th Standard	2020
<i>MPS School, Mandapeta</i>	<i>CGPA: 10.0</i>

CERTIFICATIONS

- The Joy of Computing Using Python – NPTEL (IIT Madras)
- Full-Stack Web Development Mastery – L&T EduTech
- Next-Level Git with Expert Version Control – L&T EduTech
- Mastering the Linux – L&T EduTech
- Object Oriented Programming in Java – Coursera

ACHIEVEMENTS

- **App Monetization:** Successfully monetized the "Aniset / Anify" Android application, generating over 16,000 in revenue through in-app purchases, ad integration, and active user engagement.
